

5.6. Wildlife habitat. A note was placed on your computer's keyboard, from Will Edwards, wildlife biologist, which read: "Could you perform some queries of the Brown Tract stands database for me? I am working on some wildlife habitat suitability models, and am interested in the following:"

- a) Sharp-shinned hawk habitat: acres of ≥ 25 and ≤ 50 year old stands
Result: 1,451.5 acres
- b) Cooper's hawk habitat: acres of ≥ 30 and ≤ 70 year old stands
Result: 2,287.6 acres
- c) Goshawk habitat: acres of ≥ 150 year old stands
Result: 403.5 acres
- d) Red tree vole habitat: acres of ≥ 195 year old stands
Result: 206.6 acres
- e) Also, could you make me a map of the sharp-shinned hawk habitat?"
(We'll leave that up to you)
